Author Index

Addison, E.M. 173
Alberts, J.J. 157
Alessio, L. 293
Alimonti, A. 495
Apostoli, P. 513, 527
Arcangeli, G. 551

Bacciu, F. 572
Bacon, J.R. 157
Badjik, C.D. 65
Baldi, C. 513, 527
Banks, H.A. 469
Baxter, P.J. 317
Beese, I. 461
Bergamaschi, S. 441
Berman, S.S. 109
Bernardi, A. 187
Beyersmann, D. 555
Bianchi, V. 351
Bignoli, G. 571
Boccardo, P 570
Bolt, H.M. 309, 561
Bradley, C. 49
Brancaccio, D. 553
Braun, H.E. 173
Braven, J. 215
Brescianini, C. 501
Bronzetti, G. 570
Bungaro, A. 547
Busi, L. 568
Butler, E.I. 215
Buttner, B. 555

Campbell, J.A. 141
Camuffo, D. 187
Canavese, C. 553
Capodaglio, E. 527
Caroli, S. 495, 511
Cavalleri, A. 323
Celotti, L. 567
Chapman, J. 215
Chau, Y.K. 57
Cheshire, M.V. 157
Chiesura, P. 547
Chou, C.L. 67
Cicchella, G. 551
Coceancic, D.E. 131
Coni, E. 511
Cornelis, R. 269, 401
Cory-Slechta, A. 433

Dabeka, R.W. 65
Debetto, P. 365
De Flora, S. 357
De Groot, G. 411
Dejkumhang, M. 511
Del Carratore, R. 570
Derouane, A. 201
Doenges, K. 539
Downes, C. 173
Dulude, G.R. 45
Duncan, C.E. 477

Edel, J. 511, 533, 570
Elhraiki, A. 209
Ernhart, C.B. 453

The Science of the Total Environment, 71 (1988) 576–577
Elsevier Science Publishers B.V., Amsterdam — Printed in The Netherlands

Subject Index

Aluminum, level in brain and Alzheimer's disease 59
Aluminum/citrate complex in serum, speciation by liquid chromatography–furnace AAS 49
Analytical data reliability and biological reference materials 85
Aquatic pollution, chlorinated hydrocarbons 209
—, distribution of dissolved and particulate nickel and zinc in a polluted estuary 141
Atmospheric pollution, chromium 519
—, lead, chromium and thallium 501

Biological analysis by atomic spectrometry 7
Biological reference materials, for marine chemistry 109
Biological trace element research 1
Blood lead, determination by Zeeman AAS 37
—, risk factors associated with high levels 477

Cadmium, effect of buffering capacity of the soil on levels in tissues of moose 173
Cadmium in human milk, correlation with levels in the environment and diet 65
Chelatable lead, relationship with erythrocyte protoporphyrin and urinary aminolaevulinic acid 293
Chlorinated hydrocarbons, aquatic pollution 209
Chromate, chemical modification of the plasma membrane of red blood cells 555
Chromium, concentration in air 501, 519
—, exposure and respiratory cancer 331
—, factors affecting levels in urine 527
—, kinetics during peritoneal dialysis 401
—, occupational exposure, inadequacy of current analytical techniques 301
—, parameters affecting microdetermination 511
—, toxicity to marine phytoplankton 572
—, transfer from disposed fly ash to man 571
Chromium analysis in clinical samples, sample collection and handling 269
Chromium imbalance, in dialyzed uremic patients 553
Chromium metabolism, investigation by nuclear and radiochemical techniques 533
Chromium(III), genetic effects on *Saccharomyces cerevisiae* 570
—, investigation of chronic low-level exposure 389
—, investigation of toxicity 351
—, levels in body fluids of occupationally exposed personnel 323
Chromium(VI), carcinogenicity, a review of animal data 341
—, content of red blood cells as an indicator of exposure 309
—, cytotoxicity 365
—, effects on cellular metabolism 365
—, levels in body fluids of occupationally exposed personnel 323
—, metabolic reduction, 357
—, occupational exposure 317
—, selected toxicological aspects 379
—, solubilization by nitrilotriacetic acid 567, 568, 569
—, transport across cell membrane 561
Chronic low-level exposure to metals, critical effect 243
Cobalt-60, accumulation by plants 225

Detoxification of Cr(VI) by metabolic reduction 357
Dissolved combined amino acids, determination in sea water 215

Geobiocoenosis, element abundances in abiotic and biotic systems 253
Graphite furnace AAS, characteristics and development 17
—, determination of toxic elements in biological materials 45

Heavy metals, in leachate from landfills containing urban solid wastes 495
Humic substances, comparison of HA in salt march and indigenous plant species 157

Interlaboratory studies, lead in blood 125
—, mercury in fish 131
—, toxic substances in blood and urine 111

Lead, chronic low-level exposure 433
—, concentration in air 501
—, effect of low-level exposure on psychological functioning 469
—, effect on brain neurochemistry 441
—, effect on ontogenesis of μ-opioid receptors 449
—, effect on renal function 535
—, environmental exposure, regulations, additional research (Round Table) 487
—, haematological effects 419
—, impairment of chemotaxis of polymorphonuclear leukocytes 543
—, in blood 125
—, low-level exposure and cognitive impairment 453
—, parameters affecting microdetermination 511
—, risk factors associated with high levels in blood 477
—, solubilization by nitrilotriacetic acid 569
—, traffic as a source of exposure in childhood 461
Lead analysis in clinical samples, sample collection and handling 269
Lead in human milk, correlation with levels in the environment and diet 65
Lead metabolism, investigation by nuclear and radiochemical techniques 533
Lead poisoning, heat reactivation of red blood cells 547
—, treatment by $CaNa_2$ EDTA 551

Marine chemistry, biological reference materials 109
Mercury in fish 131
Metals, critical effect of chronic low-level exposure 243
Mixed diet reference material, characterization 105

Nickel, distribution of dissolved and particulate forms in a polluted estuary 141
—, occupational exposure, inadequacy of current analytical techniques 301
Nitrilotriacetic acid, solubilization of Cr 567, 568
—, solubilization of Cr and Pb 569

pH of rainfall, seasonal variation 187

Respiratory cancer, and exposure to chromium 331

Speciation of organometals in biological materials 57
Sulphur dioxide, comparison of procedures for determination in air 201

Thallium, concentration in air 501
—, parameters affecting microdetermination 511
—, problems associated with determination in urine 513
—, sources, levels and exposure 285
—, toxicity to marine phytoplankton 572
Thallium analysis in clinical samples, sample collection and handling 269
Thallium metabolism, investigation by nuclear and radiochemical techniques 533
Thallium poisoning, toxin elimination 411
Trace metals analysis in clinical samples, sample collection and handling 269
Trace metals determination, factors affecting accuracy 67
Triethyllead, interaction with plasma membrane and cytoskeleton 539

Urinary chromium, factors affecting levels 527
Urinary thallium, analytical problems in determination 513
Urine thioether concentration, diagnostic validity 231

Zeeman atomic absorption spectrophotometry, blood lead analysis 37
Zinc, distribution of dissolved and particulate forms in a polluted estuary 141
